Cyril Orchard Group provided full Building Surveying services for the design and construction of the new classroom block at St Mary's Roman Catholic Primary School in Whitstable. Services also included gaining statutory approvals, project management and CDM Coordinator role.

The original site as pictured in the top left was home to a dilapidated temporary building containing four classrooms. The new building provided the replacement classes as well as an ICT suite and cloakroom. The new block was fully compliant with modern sustainable requirements as well as matching the adjacent block both internally and externally to maintain the schools identity and create an ideal learning environment.
